

Aisin Water Pump – WPT-166V (RoughTrax # CWP004)

Engine Application: 1KZT, 1KZTE, 2KDFTV & 1KDFTV

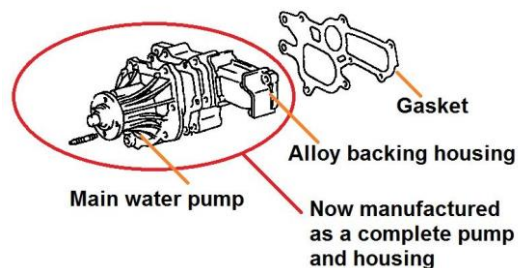

Thank you for your purchase of the Aisin **One-Piece water pump** CWP004

Please Note as per online description:

- Some earlier models such as on the **1KZT(E)** engines used a pump that fitted into a separate alloy backing housing with 6 bolts revealing the pump blades on the rear, Aisin's new design pump replaces the older 2 piece setup (pump & housing) with a more efficient one-piece pump, this is a direct replacement once your original backing housing has been removed.

CWP004 - One Piece Water pump

- As per online description - this one-piece pump will take longer to fit as it requires fitting right **back to the cylinder block**, removal of all the timing belt and associated parts is necessary as per our images –
It is 100% correct for application 1KZT, 1KZTE, 2KDFTV & 1KDFTV
